

**Prolifics, 2010 winner of IBM's Outstanding BPM Solution Award; 2008 winner of IBM's Outstanding SOA Solution; and two-time winner of the Overall Technical Excellence Award and 1 of 3 WebSphere Service Providers retained by IBM, specializes in delivering SOA solutions, content and collaborative portals, business intelligence dashboards, data cleansing strategies and security models. We look forward to assisting with your project and can help with governance and application management strategies to ensure a smooth rollout and ongoing maintenance.**

## Migration from WebSphere InterChange Server...

## ...to WebSphere Process Server

In today's IT environment, organizations are under constant pressure to deliver more with less and are looking for ways to reuse select parts of existing technology to achieve business goals. The promise of business process integration in a service oriented architecture (SOA) enables enterprises to respond to business needs on demand by delivering the flexibility of quickly assembling and changing business processes across multiple applications in response to competitive pressures, market changes and economic fluctuations.

In the past, when providing a distributed infrastructure for solving cross-application problems, including the capability to process and route business information among disparate applications, many organizations utilized IBM® WebSphere® InterChange Server (ICS). Today, newer standards and a drive towards SOA are leading organizations to choose IBM® WebSphere® Process Server (WPS), consisting of WebSphere Application Server, a core set of services to support SOA and rich set of supporting services for process automation. If you currently have an ICS implementation, you are facing a critical infrastructure decision. With continued functionality improvements to WebSphere Process Server over ICS, this is an ideal time to determine your long term goals and map out future technology plans.

Prolifics can provide your organization with a team of highly skilled certified consultants having deep technical knowledge of ICS and WPS. With our proven experience building, implementing, and migrating between these platforms, Prolifics can help map out the technology plan based on our knowledgebase of the compatibility issues and functional differences, as well as best practices around migration techniques. In fact, our consultants created an ICS to WPS accelerator tool to expedite the migration process, providing additional savings for our customers.

In addition, Prolifics can perform the migration using a "blended shore" model. With the blended shore approach, you have a local development team manage the offshore consulting team assigned to your project. With processes and methodologies for managing global virtual teams, Prolifics can provide your organization with the benefits of the offshore consulting model while delivering the efficiency and quality that is required.

### Prolifics—Your Go-To Migration Expert

#### Prolifics' Certified Migration Consultants:

- ◆ Are experienced in conducting InterChange Server (ICS) to WebSphere Process Server (WPS) migrations.
- ◆ Are skilled in both ICS and Process Server technologies.
- ◆ Are armed with a knowledgebase of known compatibility issues and functional differences between ICS and Process Server.
- ◆ Can leverage best practices for conducting successful migrations, including an ICS to WPS accelerator tool to expedite the migration process.
- ◆ Can perform the migration using a "blended shore" model giving you the cost savings of offshore development.
- ◆ Can mentor your team on WebSphere Process Server technology and best practices.
- ◆ Have a structured methodology to help you move to a new SOA environment.

### Benefits of WebSphere Process Server

- ◆ Enhance your integration solution with new features available in WebSphere Process Server, gaining business process flexibility.
- ◆ Increase your business process capabilities to include human workflow tasks.
- ◆ Move from a hub-and-spoke to an ESB infrastructure.
- ◆ Gain a standards-based business integration strategy.

#### Get Started Now! Contact Prolifics for a FREE Discovery Call!

This two hour interactive, executive workshop with a senior level Prolifics Solution Architect will discuss your high level migration requirements and help you understand your next steps.
