

WebSphere Portal — Assessments and Migrations

As businesses continue to change and adapt to gain market share, remain competitive, increase revenue and profit while containing costs, their IT departments are challenged to be agile and responsive and facilitate these business changes. IBM WebSphere Portal enables organizations to reduce costs by leveraging and extending their existing investments in enterprise data, content, processes, collaboration and security technology— with the flexibility to evolve and meet the changing requirements of today's on demand business environment.

Prolifics offers specialized services designed to unleash the value of portals and bring relevance and cohesion to your entire IT infrastructure, whether your organization is a small to midsize business or a larger enterprise. We'll help you take advantage of WebSphere Portal's collaborative capabilities so you can best utilize enterprise assets and gain maximum benefits creating a dynamic workplace for your organization.

All service offerings come with a 2-hour Discovery session with one of our Senior Portal Architects.

WebSphere Portal Migrations and Assessments

Technology Migrations:

Prolifics has a dedicated practice around technology migrations to IBM WebSphere from other J2EE application servers, such as Oracle WebLogic, Oracle Application Server, Sun iPlanet, or JBoss. Prolifics can adapt your current code assets and transform them into a new WebSphere Portal environment.

Call in the experts! Having conducted dozens of migrations, Prolifics has built a knowledgebase of compatibility and functional differences, as well as best practices around migration techniques. Rather than utilizing your staff on this one-time-only effort and building up skills they will never require again, leverage expert consultants with experience, tools and a methodology that avoids unnecessary risk, time, effort and cost.

Solution Price: Based on Scope

WebSphere Portal Version Upgrades:

If you already own IBM WebSphere Portal, move up to the latest and greatest version for improved efficiency and productivity! To get started, Prolifics' Portal Migration experts can help you assess and plan for the migration effort and the necessary skills development. Call now to schedule a Migration Assessment that will analyze your existing projects and deliver a comprehensive plan for smoothly transitioning to the new version. The report becomes an invaluable tool to guide your IT team with the migration. Or keep your project team focused on essential business initiatives, while we conduct the migration and you benefit from our previous experience.

Solution Price: Based on Scope

Portal Assessments:

Call now to schedule a Portal Assessment in which a Prolifics specialized Portal Architect will analyze your existing projects and deliver a comprehensive plan for smoothly transitioning to IBM WebSphere Portal. Your WebSphere Portal implementation is your onramp to SOA. With this new version, you can:

- ◆ Integrate Workplace Forms
- ◆ Define Performance Dashboards
- ◆ Build Composite Applications
- ◆ Implement Content Management

For those wanting to demonstrate the value statements and return on investment for the proposed project, the next step is to engage Proof-of-Concept Services. Prolifics consultants first work with your team to understand business goals and concerns, and then identify a relevant module(s) for use in the pilot project. The pilot will use a real portion of the production application, which can then be reused once the implementation project moves forward.
