

ENTERPRISE PORTAL SOLUTIONS

Portals have come to play a strategic role for Enterprises in their endeavor to effectively engage and service different end-users. Be it automation of a business process that enhances workforce effectiveness, creation of intelligent dashboards that provide real-time insights on aggregate performance, internal blogs to foster thought leadership and employee camaraderie, or creation of new business and revenue models to spur innovative and exponential growth, Portals are deployed to enable internal and external directives.

Prolifics' Portal Solutions are designed to create competitive differentiation and improve business agility for organizations in response to rapid changes in the competitive environment. Leveraging best-of-breed technologies, application frameworks and pre-built components these Portal solutions are designed and developed for future growth – satisfying technical and business needs that may include mobile applications, RIA, mashups, security, high-volume transactions, JSR standards, load balancing, multilingual needs and a dynamic user experience.

With over 30 years of IT experience and multiple awards for Portal excellence, Prolifics specializes in delivering high-performing and scalable Portal solutions which include: Employee portal, Corporate extranet, Partner portal, Customer self service, Executive dashboards, Collaborative workspace, eGovernment portal and B2B/B2C portals.

“In a word - impeccable. The team was highly professional and followed best practices with project management with daily updates providing 'white glove' treatment from start to finish. We are all thrilled with our solution.”

— Valerie Griest, Manatee County Sheriff's Department

Related Service Offerings

A priority to any successful portal application launch is a focused effort around assessing its quality and determining how the solution meets expectations. We can deliver software quality assurance services and a test automation framework to improve testing cycle times, ensure successful rollouts, and increase confidence in business applications.

Web Content Management manages and accelerates development and delivery of critical business information across enterprises. Our certified experts can implement an authoring and publishing environment to enable "end-to-end" collaboration for content creation, approvals, management, retention, and publishing across Internet, Intranet, and Extranet portals.

We offer high level architecture analysis of your new or existing Portal solution and recommend ways to optimize performance, achieve higher scalability and throughput, and establish performance monitoring strategies and tooling.

Performance Engineering

Security Services

Security and Identity Management is vital to safeguard your online presence from dangerous attacks and unauthorized access. Our service offerings include security management across users, applications, data and infrastructure. We can also ensure compliance regulations such as Sarbanes-Oxley (SOX), HIPAA, and others.

About Us

Prolifics is the largest systems integrator specializing in IBM technologies. Having garnered awards for its solutions and technical excellence across IBM's entire software portfolio, Prolifics provides expert services including architectural advisement, design, development and deployment of end-to-end SOA, Portal and Security solutions. SemanticSpace, Prolifics' parent company, is a global IT services firm providing application development, testing, application maintenance and outsourcing services. Bringing over 30 years experience and a strong global presence across US, Europe and Asia, the SemanticSpace companies offer clients end-to-end services combined with the market's most seasoned and skilled consultants and the dedicated care and attention that comes from a highly-specialized, boutique company. By combining application frameworks, prebuilt components, custom development expertise, a governance framework and a blended shore model, we help organizations decrease risk in complex software development and deployment investments, improve time to market and increase success of business strategy execution.
